

LABORATORUL DE MICROBIOLOGIE MEDICALA

DENUMIREA ANALIZEI	DURATA
Aspirat traheal (cultura, examen citobacteriologic, ex microscopic bacteriologic) Aspirat traheal (cultura fungi) Bila - cultura Exsudat faringian - cultura Exsudat faringian - cultura fungi Lichid de punctie abdominala – examen citobacteriologic, culturi, examen bacterioscopic Lichid de punctie articulara – examen citobacteriologic, culturi, examen bacterioscopic Lichid de punctie articulara - ragocite Lichid de punctie pleurala – examen citobacteriologic, culturi, examen bacterioscopic Lichid de punctie rahidiana – examen citobacteriologic, culturi, examen bacterioscopic SCREENING exsudat faringian (preoperator, detectare MRSA) SCREENING materii fecale (preoperator detectare bacterii MDR: BLSE, VRE, CRE) SCREENING tampon axila (preoperator, detectare MRSA) SCREENING tampon inghinal (preoperator detectare bacterii MDR: MRSA, BLSE, VRE, CRE) SCREENING tampon nazal (preoperator, detectare MRSA) SCREENING tampon rectal (preoperator detectare bacterii MDR: BLSE, VRE, CRE) SCREENING tegumente (preoperator detectare bacterii MDR: MRSA, BLSE, VRE, CRE) Secretie conjunctivala – cultura, examen microscopic bacterioscopic Secretie otica - cultura, examen microscopic bacterioscopic Secretie puroi - cultura, examen microscopic bacterioscopic Secretie (conjunctivala, otica, puroi, vaginala) - cultura fungi Secretie vaginala (secretie col) - cultura Secretie vaginala – examen microscopic citobacteriologic pe lama Secretie uretrala Secretie linguala - cultura fungi Secretie nazala - cultura Secretie nazala - cultura fungi Sputa – cultura, examen citobacteriologic, examen microscopic bacteriologic Sputa - culturi fungi Urocultura	3 zile lucratoare
Bila - examen microscopic parazitologic Fir de par-examen microscopic micologic	1 zi lucratoare

Scoame - examen microscopic micologic Unghii - examen microscopic micologic Exsudat faringian - examen microscopic pentru diagnosticul anginei fuzospirilare Lichid de punctie articulara - ragocite Lichid de punctie - examen microscopic bk Materii fecale-coprocitograma Materii fecale-examen de digestie Materii fecale – examen coproparazitologic Sputa – examen microscopic pentru bk Urina - examen microscopic pentru bk Antigen Streptococcus pneumoniae, Legionella din urina Detectare toxina E. coli din materii fecale Detectare toxina Clostridium difficile in materii fecale Detectare Rotavirus / Adenovirus in materii fecale	
MULTIPLEX PCR RESPIRATOR SUPERIOR PLURI CoV-2 FLU-RSV ARN Aspergillus Diagnostic molecular infectii cu transmitere sexuala	1 zi lucratoare
Hemocultura	7 zile lucratoare
Scoame - cultura fungi Unghii -cultura fungi Fir de par-cultura fungi	30 zile
Lichid de punctie - cultura bk	60 zile
